Java Core Multiple Choice Questions with Answers 2021. Here it encodes the compiler by sharing a list of 40 objective Java questions and answers for first-year students and experienced Java developers. We hope these Java MCQ questions will help you decipher your next Java interview. All the best for your future and happy learning of Java. 1) A process that involves recognizing and focusing on the important characteristics of a situation or object is known as: (a) Encapsulation (b) polymorphism (c) abstraction (d) inheritance (e) persistence of the object. A) C ?) What statement is true with respect to an object? (a) An object is what instantiated classes are of (b) An object is an instance of a class (c) An object is a variable (d) An object is a reference to an attribute (e) An object is not an instance of a class. A) b 3) In object-oriented programming, composition is related to (a) the use of consistent coding conventions (b) the organization of interacting components to achieve coherent and common behavior (c) the use of inheritance to achieve polymorphic behavior (d) The organization 3n of components that interact to not achieve a coherent common behavior (e) the use of hidden data to achieve the polymorphic behavior. A) B 4) In object-oriented programming, new classes can be defined by extending existing classes. Here is an example of: (a) encapsulation (b) interface (c) composition (d) inheritance (e) aggregation. A) d 5) Which of the following options does not belong: if a class inherits from some other class, should it (a) make use of the capacities of the main class (b) excessive or add the minimum to achieve the purpose of the derived class (c) Over-ride all the methods of its main class (d) Sec Make sure the result "is a base class (e) Make sure the result" Contains your base class. A) C (6) object-oriented inheritance the (a) "is a kind of relationship" (b)" has a relationship" (c) "the inheritance does not describe the type of relationship" between the classes (e) "contains" de a ?) The wrapping up of data and functions into a single unit is called (a) Encapsulation (b) Abstraction(c) Data Hiding (d) Polymorphism (e) Message passing. A) a 8) Polymorphism (a) Is not supported by Java(b) Refers to the ability of two or more objects belonging to different classes to respond to exactly the same message in different class-specific ways(c) Simplifies code maintenance(d) Not simplifies code maintenance(e) Refers to the ability of two or more objects belonging to different classes to respond to exactly the same message in different class-specific ways and simplifies code maintenance. A) e 9) In object-oriented programming, new classes can be defined by extending existing classes. This is an example of: (a) Encapsulation (b) Interface (c) Composition(d) Inheritance (e) Aggregation. A) d 10) Given a class named student, which of the following is a valid constructor declaration for the class? (a) Student (student s) { } (b) Student student () { } (c) Private final student () { } (d) Void student () { } (e) Static void student() { }. A) a 11) What is garbage collection in the context of Java? (a) The operating system periodically deletes all of the java files available on the system.(b) Any package imported in a program are not used is automatically deleted.(c) When all references to an object are gone, the memory used by the object is automatically reclaimed.(d) The JVM checks the output of any Java program and deletes anything that doesn't make sense.(e) When all references to an object are gone the memory used by the object is not reclaimed. A) c 12) The concept of multiple inheritances is implemented in Java by I. Extending two or more classes.II. Extending one class and implementing one or more interfaces.III. Implementing two or more interfaces. (a) Only (I) (b) (I) and (II) (c) (II) and (III)(d) Only (I) (e) Only (II). A) c 13) In Java, declaring a class abstract is useful (a) To prevent developers from further extending the class(b) When the class does not make sense to have objects of that class (c) when the default implementations of some methods are not desirable (d) to force developers to extend the class to not use its capabilities (e) when it makes sense to have objects of that class. A) B 14) A What is the error in the following class definitions? Abstract class xy (abstract sum (int x, int y) {} (a) Class header is not defined correctly. (B) The constructor is not defined. (C) The m@ all is not defined correctly (d) The m@ all is defined correctly (e) Without error. A) C 15) A Are these field declarations legal within the body of an interface? (a) PRIVATE FINAL RESPONSE INT A) B 16) A package is a collection ^ (a) classes (b) interfaces (c) editing tools ^ (d) classes and interfaces (e) editing tools and interfaces ^ (a) D 17) A everything within a class can only be accessed by classes that are defined within the same package as the everything class. A) Is the following used to enforce this restriction? n? (a) Declare the m@ all with the private keyword (b) declare the m@ all with the protected keyword (c) declare the m@ all with the protected keyword (d) does not declare the m@ all with the accessibility modifier (e) declare the m@ all with the private and public keyword. A) D 18) Basic Java language functions are stored in Awhich of the following Java package? (a) java.lang (b) java.io (c) java.net (d) java.util (e) java.awt a) 19) A of the following is a member of the java.lang package? (a) List (b) tail (c) Math (D) Stack (E) Process. A) C The "Math" class contains all the elements for performing basic numerical operations such as exponential functions, logarithm, square root and trigonometric elementary functions. 20) A Does one of the following have a m@ all FLUSH names (? (a) input flow (b) output transmission^ n (c) reader transmission^ (d) reader transmission^ n input (e)^ input output transmission. A) B Core Java Multiple Choice Questions ^ n # 21) A What is the fundamental unit? fundamental? information about writers? (a) characters (b) bytes (c) Archives (d) Records (e) information. A) A Java Multiple Choice Questions # 22) In what package the file class is included? (a) Java. A) a core Java multiple choice questions # 23) given the chain code s1 = a "s@"; chain s2 = a "s@"; chain s3 = new chain (s1); What of the following equivalent to True? (s) == s2 (b) s1 == s2 (c) s3 == s1 (d) s3 = s1 (e) s1! = s2. A) A Core Java Multiple Choice Questions # 24) URL means (a) Universal Readers Locator (B) Universal Reform Charger (C) Uniform Resource Locator (E) Uniform Readers Locator. A) D Core Java Multiple Choice Questions # 25) What is the sequence of important events in the life of an Applet? (a) Init, start, stop, destroy (b) start, init, stop, destroy (c) init, start, destroy (e) destroy, start, init, stop. A) A Core Java Multiple Choice Questions # 26) What of the following questions is true regarding Applet's execution? (a) Applets loaded from the same computer where they are executing have the same restrictions as applets loaded from the network. (b) Applets loaded and executed locally do not have any of the restrictions faced by the applets that are loaded from the network. React to user entry and change dyts (e) Applets can be executed independently. A) B Core Java Multiple Choice Questions # 27) What is the type of return of the M@ all MEGIDA () defined in the Awtevent class. (a) int (b) long (c) object (d) component (e) Float. A) A core Java multiple choice questions # 28) What of the following events will cause a thread (a) The m@ all all Sleep () is called (b) the whole wait () is called (c) execution of the all start () ends (d) execution of the world ) Execution of the run () method is called. A) d Core Java Multiple Choice Questions # 29) What will be the result of expression 13 & 25? (a) 38 (b) 25 (c) 9 (d) 12 (e) 21. A) C Core Java Multiple Select Questions # 30) Which of the following statements is true with respect to the finalize () method? (a) The finalize () method must be declared with protected accessibility (b) The compiler will not compile the code it tries to explicitly call finalize () method (c) The body of the finalize () method may only have access to other objects that are eligible for collection of unused items (d) The finalize () method may be overridden (e) The finalize () method may not be overridden. A) d Questions and Answers about Main Java Objectives Multiple Choice Questions for Core Java # 31) Which of these questions is a valid method statement? a) null method1 (b) null method2 (c) null method3 (vacuum) (d) Method4 (e) Methods (vacuum). A) b Core Java Multiple Choice Questions # 32) Given a class called Book, which of these is a valid constructor statement for the class? (a) Book (Book b) { } (b) Book (Book ) { } (c) Private final book (s) { } (d) Empty book (s) { } (e) abstract book (s) { }. A) A Core Java Multiple Choice Questions # 33) A will the result of trying to compile the following program? public class MyClass {long var;public void MyClass (long param) { var = param; } // (1) public static void main (String[] args) {MyClass a,b;a = new MyClass (); // (2) b = new MyClass (); // (3) } (a) A compiler error will occur in (1), since constructors cannot specify a return value (b) A compile error will occur in (2), because the class does not have a default constructor (c) A compiler error will occur in (3), since the class does not have a constructor that takes an argument of type int (d) The program will be compiled correctly (e) The program will be compiled and executed correctly. A) c Core Java Multiple Questions # 34) Given the next class, what of these is a life way of referring to the class from outside the net.basemaster package? net.basemaster? tuba eurt si tneometab hciHW 193 c) A .egakcap a edistuo morf detecorp naht evitcirtser eronM@detavirp naht evitcirtser ssel tub .detecorp naht evitcirtser eroM@detecorp naht evitcirtser ssel .tub be (1) (2) (3) (4) (5) (6)
